Professional Summary

Cybersecurity-focused BCA student with hands-on experience in web application security, vulnerability assessment, penetration testing labs, and network enumeration. Completed cybersecurity training with practical exposure to Burp Suite, Nmap, Wireshark, Linux, web security vulnerabilities, and reconnaissance techniques. Seeking an entry-level Junior Penetration Tester or Security Analyst role to apply practical security skills in real-world environments.

Education

Bachelor of Computer Applications (BCA) 2025 – 2028
Maharishi University of Information Technology, Lucknow

Experience / Cybersecurity Projects

PortSwigger Web Security Academy – Web Security Labs Hands-on Security Labs

- Practiced web application penetration testing through PortSwigger Web Security Academy labs.
- Performed hands-on testing of common web vulnerabilities including Reflected and Stored XSS, SQL Injection, IDOR, and business logic flaws.
- Used Burp Suite Proxy, Repeater, Intruder, and HTTP request/response analysis to identify and validate application security issues.
- Analyzed authentication, authorization, input validation, session handling, and access-control weaknesses in controlled lab environments.
- Documented vulnerability behavior, exploitation steps, impact, and security recommendations for completed labs.

TryHackMe – Penetration Testing Labs Hands-on Cybersecurity Practice

- Performed reconnaissance, enumeration, and vulnerability analysis on authorized TryHackMe machines and cybersecurity training environments.
- Used Nmap for host discovery, port scanning, service enumeration, and basic version detection.
- Practiced web enumeration using tools such as Gobuster and ffuf in controlled lab environments.
- Worked with Linux command-line tools, networking concepts, HTTP/HTTPS, DNS, and common penetration-testing workflows.
- Analyzed findings and prepared structured lab notes and technical reports describing methodology and results.

Web Application Security Testing Lab Personal Cybersecurity Project

- Built and tested controlled web security labs to understand vulnerabilities including XSS, CSRF, SQL Injection, IDOR, and file inclusion concepts.
- Captured and modified HTTP requests using Burp Suite to understand how web applications process user-controlled input.
- Analyzed HTTP headers, cookies, authentication mechanisms, parameters, and server responses during security testing.
- Applied security testing methodology including reconnaissance, enumeration, vulnerability identification, validation, and reporting.

Technical Skills

Cybersecurity	Web Application Security, VAPT, Penetration Testing, Vulnerability Assessment, OWASP Top 10, Reconnaissance, Enumeration
Web Vulnerabilities	XSS, SQL Injection, IDOR, CSRF, Authentication Issues, Authorization Issues, Business Logic Flaws, File Inclusion
Security Tools	Burp Suite, Nmap, Wireshark, Gobuster, ffuf, Amass, Nuclei, Nikto, Metasploit Framework, Sherlock, Shodan, ExifTool
Networking	TCP/IP, OSI Model, DNS, HTTP/HTTPS, TCP/UDP, IPv4, IPv6, ARP, Ports and Services
Operating Systems	Linux, Kali Linux, Windows, macOS
Programming	Java, C, HTML, CSS, JavaScript, SQL
Security Platforms	PortSwigger Web Security Academy, TryHackMe

Certifications & Training

- **Cybersecurity Course – Tutedude** Completed
- **PortSwigger Web Security Academy** – Hands-on Web Security Labs
- **TryHackMe** – Practical Cybersecurity and Penetration Testing Labs

Practical Cybersecurity Knowledge

- Web Application Security Testing and HTTP Request Analysis

- Reconnaissance and Passive Subdomain Enumeration
- Network Scanning and Service Enumeration
- Burp Suite Proxy, Repeater and Intruder
- Linux Command Line and Kali Linux
- Basic Vulnerability Assessment and Security Reporting
- Understanding of OWASP Web Application Security Risks

Professional Skills

Problem Solving — Analytical Thinking — Security Research — Technical Documentation — Continuous Learning

Additional Information

Interested in entry-level opportunities in Cybersecurity, Junior Penetration Testing, VAPT, Web Application Security, and Security Operations.
